

Pie Charts

1. 3D Pie Chart Example

Here is code for a simple 3D Pie Chart...

```
double[] data= { 81d, 55d, 39d, 20.6d };
String[] labels= { "BMW M5", "BMW M3", "Viper GTS-R", "Corvette Z06" };
Paint[] paints= { Color.lightGray, Color.green, Color.blue, Color.red };

PieChart3DProperties pieChart3DProperties= new PieChart3DProperties();
PieChartDataSet pieChartDataSet= new PieChartDataSet( "Cars That Own",
                                                    data,
                                                    labels,
                                                    paints,
                                                    pieChart3DProperties );

PieChart3D pieChart3D= new PieChart3D( pieChartDataSet,
                                       new LegendProperties(),
                                       new ChartProperties(),
                                       400, 350 );
```
