

Chart Borders

1. Adding a Border

No border is drawn around the charts by default. You can change that by assigning a `ChartStroke` Object to the `ChartProperties`. There is a default border implementation of `ChartStroke.DEFAULT_CHART_OUTLINE`.

```
ChartStroke borderStroke= new ChartStroke( new BasicStroke( 2.0f ), Color.red );  
chartProperties.setBorderStroke( borderStroke );
```

Chart Border
