Pie Charts

1. Border Stroke

The border of the Pie Chart uses the `java.awt.Stroke` Interface to control its rendering properties. There are several implementations of the `java.awt.Stroke` Interface in the `java.awt` Package to choose from.

The border of the Pie Chart uses the `java.awt.Paint` interface to control its rendering properties. There are several implementations of the `java.awt.Paint` Interface in the `java.awt` Package to choose from.

```
ChartStroke chartStroke= new ChartStroke( new BasicStroke( 4f ), Color.orange );
pieChart2DProperties.setBorderChartStroke( chartStroke );
```
